

Gray Line Münchener Stadtrundfahrten safety and hygiene concept

Information for distribution partners

We want our passengers to feel safe on their tour - especially in times of corona.

The health and safety of our passengers and staff is our top priority. We have implemented extensive protection and hygiene measures so that customers can continue to use our service with confidence.

New safety distances for boarding

We ensure that there is sufficient distance between the passengers. Therefore, we have defined boarding zones providing the necessary space. The entry/exit takes place via separate doors, front and rear.

Obligation to wear a face covering

We are only allowed to transport passengers if they are wearing a face covering. Only face masks of the following standards will be permitted on board our buses: FFP2, KN95 and N95 standard.

Hand sanitizer available on all buses

All our buses are provided with hand sanitizer or contactless hand sanitizer dispensers.

Ventilation of passenger compartments

The passenger compartments in our buses are continuously supplied with fresh air. Whenever the weather permits we will open our convertible roof. At the terminuses, additional aeration takes place via the entries and exits by leaving the doors open for longer.

Deep-clean of passenger compartments

We have intensified the cleaning of passenger compartments by taking additional measures, such as cleaning grab handles and other surfaces even more thoroughly.

Contactless boarding using online tickets

Passengers can board our buses using a contactless mobile ticket. Tickets are available in our online shop or at distribution partners.
