Measures to Ensure Social Distancing

Queuing

Floor markings

Signs and announcements

Buses and walk boarding

Roaming staff

Seating and elevators

Protection for Passengers and Staff

Hygiene and disinfection

Infection barriers

Face coverings

Passengers with reduced mobility (PRMs)

Guidelines for staff

Measures to Ensure Social Distancing Queuing

- To ensure social distancing, passenger densities will be reduced by:
 - Widening lanes so passengers are at least 1.5 meters apart, also between adjacent lines
 - Using only every other lane whenever possible or necessary
 - Informing passengers about distancing rules in waiting areas

Measures to Ensure Social Distancing Floor markings

- Floor markings are being made in the main process areas:
 - Check-in counters and self check-in machines
 - Security checkpoints
 - Passport checkpoints
 - Gate counters
 - Baggage claims
 - Lost & found counters
 - Information desks
 - Ticket counters

Measures to Ensure Social Distancing Signs and announcements

- Consistent signage to increase awareness of social distancing rules in all terminal and process areas
- Repurposing of existing signs (dynamic and static), e.g.
 - Monitors and boards (e.g. FIDS, InfoGate counters, gate monitors, etc.)
 - Poster stands
- Use of automated PA system to regularly inform passengers in multiple languages in all terminal areas about all necessary measures

Measures to Ensure Social Distancing Buses and walk boarding

- Groundhandling staff with direct passenger contact is required to wear face masks
- Groundhandling staff follow the guidelines of Munich Airport for dealing and behaving with colleagues, passengers and partners to prevent an infection with COVID-19
- Driver's compartment of all buses is separated by plexiglass barriers
- Separate disinfection and special cleaning of all touchable surfaces
- Walk boarding / deboarding has been rolled-out to further aircraft stands to avoid bus boarding / deboarding of aircraft types that can not use the passenger bridge

Measures to Ensure Social Distancing Roaming staff

- Staff roam the terminals to monitor compliance with social distancing rules by
 - Proactively addressing passengers
 - Assisting and advising passengers

Measures to Ensure Social Distancing Seating and elevators

- Seats have stickers with distancing reminders
- Consistent signage at and inside all elevators to increase awareness of social distancing rules
- Information on the maximum capacity of each elevator

Protection for Passengers and Staff Hygiene and disinfection

- Enhanced cleaning and disinfection procedures for all areas used by passengers
- Regular deep cleaning and disinfection of all workplaces, equipment e.g. baggage trolleys and other surfaces that may be touched
- Installation of disinfectant dispensers at key points along the passenger journey (e.g. security checkpoints, immigration and passport checkpoints, baggage claims)

Protection for Passengers and Staff Infection barriers

- Installation of Plexiglas barriers at all counters and workplaces where staff directly interact with passengers:
 - Ticket counters
 - Check-in counters
 - Gate counters
 - Information desks
 - Lost & found counters
 - Immigration and passport checkpoints
 - Security checkpoints
 - Staff and goods inspection points

Protection for Passengers and Staff Face coverings

- All passengers and staff are required to wear a face covering (e.g. a face mask) inside the terminals (T1; modules A-E, central area, "Hall F", Terminal 2 Gates G/H, SAT Gates K/L and General Aviation Terminal (GAT))
- Face masks can also be purchased from
 - Several vending machines with hygiene products in Terminal 2
 - All pharmacies in Terminal 1 and 2
 - Drug store / grocery shop in the Munich Airport Center

Protection for Passengers and Staff Passengers with reduced mobility (PRMs)

- Passenger service provider:
 - Plexiglas barriers between adjacent workplaces
- Personal protective equipment:
 - Protective masks and gloves for service agents
- Hygiene measures:
 - Service agents must practice personal hygiene after helping each passenger (by washing and disinfecting their hands)
 - Equipment must also be sanitized with wipes after each use
 - PRMs must also stay far enough from one another and all other passengers while waiting and being assisted.
 - PRMs can be seated in waiting and gate areas, separated by unoccupied seats

Protection for Passengers and Staff Guidelines for staff

- To protect our staff while they are working, Munich Airport has developed guidelines for dealing with and behaving toward coworkers and partners in ways that prevent infection. The measures include:
 - Working from home, if possible
 - Wearing a face mask or other suitable face covering
 - Maintaining a sufficient distance from others
 - Keeping personal meetings and contacts to a minimum
 - Entering the security area only if required for work
 - Not shaking hands
 - Regularly washing and/or disinfecting hands.

Verhaltensregeln in Besprechungsräumen

- leder bringt seine benutzten Gläser/Geschirr nach de
- Vährend und nach der Besprechung ist der Raum, wer

Coronavirus so schützen wir uns

Masken-Tragepflicht in allen Abfertigungsaebäuden

Verhaltensregeln für Pausen- und Aufenthaltsräume

- Halten Sie die für jeden Raum festgelegte Maximalbe die sich an der Raumgröße orientiert, ein. Als Orientierung f eine Belegung gilt 4-5 qm Raumfläche pro Person
- alten Sie mindestens 1,5 m Abstand zu anderer
- stand nicht gewährleistet werden kann

- Die Räume, wenn möglich, oft ausglebig lüfter

Thank you
